

Black Iron Wire

Black iron wire, known as black oil iron wire, or carbon steel iron wire. And this kind of product can be galvanized into galvanized iron wire or annealed into annealed iron wire.

Black iron wire Characteristics:

Black iron wire is simply oil painted against rust, without any galvanizing.

Black iron wire is mostly used in construction or as binding materials. It is more economic compared with annealed wire

Black Iron Wire is supplied in reel, coil or cut into certain sizes or in U shape.

Black iron wire Applications:

Black iron wire is a kind of hard drawn carbon steel wire, suitable for weaving, fencing, galvanizing or tying applications.

Besides black iron wire is mostly used in construction or daily use as binding material.
