

Wire Mesh Fence

Material:

The material of Sunshine Wire Mesh Fence is low carbon steel wire, stainless steel wire and aluminum-magnesium alloy wires

Weaving:

The weaving method of wire mesh fence is weaving and welding.
Fence length 2m, 2.5m as standard.

Characteristics;

Sunshine Wire Mesh Fences enjoy such properties as corrosion resistance, aging resistance, sunshine resistance and weather resistance.

Forms of corrosion resistance for mesh fencing products include electric galvanizing, hot-dip galvanizing, PVC sprayed coating and PVC dipped coating.

Features

- § Intersections are welded to form an integral non-collapsible barrier
- § Low maintenance costs
- § All wire is either lightly or fully pre-galvanized
- § Fencing mesh is ideal for the installation of security alarm systems
- § Mesh can be crimped when installing the fencing on uneven ground
- § Also available with security spring anti-theft device
- § Mesh does not sag
- § Wires cannot be unraveled
- § Top and bottom wire spikes give added security.

Applications:

Sunshine Wire Mesh Fence is widely used in highways, railways, airports, residential area, port terminal, gardens, farming, animal husbandry and the guardrail protection.

Specifications of Wire Mesh Fence:

Specification of Wire Mesh Fences	Spotted by 4mm diameter quality mild steel wire
Opening (mm)	75x150
LxW (mm)	1800x3000
Frame (mm)	20x30x1.5
PVC coating thickness (mm)	0.7-0.8
With coating (mm)	4.8
Support post (mm)	diameter 48x2x2200
Base for fence(mm)	500x300x300
